Hydroquinone, Tretinoin & Mometasone Cream

Cosmelite[®] कॉस्मिलीट

FOR EXTERNAL USE ONLY

SCHEDULE H PRESCRIPTION DRUG-CAUTION

Not to be sold by retail without the prescription of a Registered Medical Practitioner.

COMPOSITION:

Hydroquinone USP2.0% w/w
Tretinoin USP 0.025% w/w
Mometasone Furoate IP..... 0.1% w/w

PHARMACOLOGY:

Hydroquinone is classified therapeutically as a depigmenting agent.

Tretinoin is all-trans-retinoic acid formed from the oxidation of the aldehyde group of retinene to a carboxyl group. Tretinoin is classified as a keratolytic agent.

Mometasone Furoate is a synthetic corticosteroid with anti-inflammatory activity.

The combination agents in **Cosmelite** act by inhibiting one or more steps in the tyrosine-tyrosinase pathway of Melanin synthesis. It also effects the formation of melanization and degradation of melanosomes and eventually causes necrosis of the whole melanocytes. The hyperpigmented areas fade rapidly than surrounding normal skin; 80% of patients with Melasma may note some improvement within 8 week period.

INDICATIONS:

Cosmelite Cream is indicated for the gradual bleaching of hyperpigmented skin conditions such as Melasma, Chloasma, Freckles, Senile Lentigines and other unwanted areas of Melanin Hyperpigmentation.

CONTRAINDICATIONS:

Prior history or allergic reaction to Hydroquinone, Tretinoin and Mometasone.

The safety of **Cosmelite** during pregnancy and children (12 years and under) has not been established.

Caution to be exercised when **Cosmelite** is administered to nursing woman.

PRECAUTIONS:

Strictly For External use only.

Important to avoid contact with eyes, mouth and mucous membranes.

Exposure to sunlight or UV light will cause repigmentation of bleached area.

ADVERSE REACTIONS:

The adverse reactions reported are dryness, fissuring of paranasal and infraorbital areas, erythema and stinging. Occasional hypersensitivity (localized contact dermatitis) may develop. If this occurs, the medication should be discontinued and the physician should be consulted immediately.

Cosmelite should be applied preferably once daily in the evening. Duration of application would be decided by the physician depending upon the response.

STORAGE:

Store in a cool, dark place. Do not freeze.

PRESENTATION:

Cosmelite is supplied in a 15g, 20 g and 25 g tube.

Keep tube tightly closed after use.

Keep out of the reach of children.
